

# Light & Colour For Health & Beauty

## Range Of Treatments:

We cover a very wide variety of complaints and aid in their recovery. The principles by which the Bioptron and [Swissological](#) Skin Care products work give them universality to their areas of application. They aid in the general recovery of any living cell, and together with the precision of the Heel homeopathic remedies can form some very effective treatment regimes. The Bioptron and all of the products which we use alongside it work very well as preventative care or alongside any existing and ongoing treatment as they have no known side-effects and do not interfere with any modern medication. Following is an alphabetized list of some of the most common complaints which we get, we cover many others, so if your disorder is not featured on this list please enquire by any means listed on the [contact us](#) section of this website and we would be pleased to answer any queries you might have. Visit our [range of treatments](#) section to see photos of some complaints before and after light treatment.
