

# BIOPTRON PRO 1

PAG-990

## BIOPTRON PRO 1 FEATURES

The BIOPTRON Pro 1 Light Therapy device is designed for use at **home**, in **hospitals** and therapeutic centers. With BIOPTRON Pro 1 you save energy, time and money as the state-of-the-art **sleep mode** only uses 0.5 W standby power so that the device can be ready for treatment anytime you want with **no energy waste**.

The device is available either with a functional floor stand and/or an **ergonomic table stand** allowing flexible use in domestic and professional environments. Easily adjustable height and head inclination as well as the ability to rotate the device head up to 360° allow a convenient usage for nearly any position. Treatments can easily be timed by a control panel down to 30 seconds. An integrated distance rod ensures the recommended distance to the skin surface area. The table stand is additionally equipped with a dust cover and a comfortable supportive mat (That can be disinfected, exchangeable and washable).

The **filter** diameter of BIOPTRON Pro 1 (approx. 11 cm) allows the treatment of small as well as bigger areas. With the new sleep mode function, you can keep your BIOPTRON device always ready for treatment with nearly no energy consumption.

FAST, EASY TO USE AND SAFE

For all BIOPTRON devices a floor stand is available which allows optimal positioning and a convenient treatment of the whole body to meet everyone's needs.
