

Questions & Answers For a Healthy Life

VacSy Food Storage System

Question: Can an older VacSy Pump from another VacSy Line such as the Orange Line or the Gray Line be used on the new Green Line of VacSy Food Storage containers?

Answer: Yes, any older version of the VacSy pump can be used on the new Green Line containers. The benefit of the new Green Line pump is that it is rechargeable and as such does not need to be close to an electrical receptacle to be used.

VacSy Food Storage System

Question: Will the VacSy Universal Lids be used on Ball and Mason Jars

Answer: The VacSy Universal Lids need a perfectly smooth level surface on the glass container for the lid to vacuum properly. Most people experiment on containers until they find a container that will work and stay with them. If the container does not have a perfect level top then the vacuum will eventually leak.

Bioptron Light Therapy

Question: I have an older set of Bioptron Color Light Therapy set that was designed to be used on the old Bioptron Compact III. Can the older Color Therapy Set be used on the new Medall or Yourhron?

Answer: The new Medall and Youthron lens is larger than the Bioptron Compact III but don't worry. Bioptron has made a Color Filter Interface Adapter that allows the Compact III Color Set to be used on the new Medall or Youthron.

Bioptron Light Therapy

Question: What is the difference between the new Medall and Youthron lamps?

Answer: The two lamps are exactly the same. The Bioptron Medall Lamp is marketed in Europe and the Bioptron Youthron Lamp is marketed in the United State. The name on the lamp is the only difference.

Bioptron Light Therapy

Question: If I buy a Bioptron Youthron in the United States can it be used when I travel in Europe or do I need a special transformer to use it.

Answer: All Bioptron Lamps are made with universal current which means that you do not need any transformer but just an adaptor to use your lamp anywhere around the world.
